Online seminars on Living in Australia: Myths about insurance: What is insurance? What is the best insurance?

Somebody said that it may be bad wasting money on insurance when you may never have to make a claim; however, it could be worse if you are not covered by insurance when things do go wrong and you are involved in an unexpected accident, disaster or other loss.

Under the influence of pandemic, life of new migrants in Australia are facing great challenges. Among the large volume of information on insurance available to us, how could we make prudent choices? What is the difference between insurance broker and insurance agent? Why is it that the 'full cover' does not cover everything?

This seminar will explain the concept behind 'insurance' and give an overview of the type of insurance we would need in Australia e.g. car insurance, home and content insurance, travel insurance, worker's compensation insurance etc. We will go through the 'crux' of insurance and show you how to find the best insurance for our life.
